1. Executive Overview

The \$DRUMM token is the native utility engine of the **Moon Highway** ecosystem, deployed on the **Polygon (PoS)** network for high-speed, low-cost transactions. The economy is structured as a circular model designed to reward long-term player engagement while funding continuous technical innovation.

2. Token Specifications

Parameter	Detail
Token Name	DRUMM
Ticker	\$DRUMM
Total Supply	1,000,000,000 (Fixed)

3. Strategic Allocation (70/30 Split)

70% - Community Airdrop & Rewards

700,000,000 \$DRUMM

- **Progression Airdrops:** Automated rewards for climbing the 30-level XP hierarchy.
- **Daily Missions:** Consistent earnings for completing daily Space Noir tasks.
- **High-Tier Incentives:** Exclusive rewards for "Space Magnate" status holders.

30% - Project Development & Team

300,000,000 \$DRUMM

- **Engine Optimization:** Maintaining 1.8MB high-fidelity 3D assets in Three.js.
- **Infrastructure:** Server scaling and smart contract security maintenance.
- **Operations:** Marketing, partnerships, and team expansion.

4. The Revenue Cycle (The Loop)

Moon Highway operates on a sustainable circular flow:

- **The Inflow:** Players purchase **Starter Packs** to begin their career. 100% of this revenue funds the 30% Project Development pillar.
- **The Outflow:** As players engage with the game, tokens from the 70% Airdrop Pool are released back to them based on activity and XP.
- **External Stabilization:** Revenue from integrated Ad SDKs (CrazyGames, Poki, AdSense) is used to support token liquidity and ecosystem health.

5. Utility & Hierarchy

The token utility scales with the player's economic status:

- **Worker:** Initial access to basic earning tasks.
- **Operator:** Access to vehicle physics upgrades and increased multipliers.
- **Space Magnate:** Peak rewards and governance voting rights on future districts.
